

Major US investment management company chooses HCL Workload Automation over competition to streamline their current operations

Automated delivery of critical operations

Reduce operation cost

Speed up their cloud transformation

Overview

One of the oldest asset management companies in the world known for pioneering the mutual fund. The company has been revolutionizing the industry and has opened the door to investment for millions of Americans.

Challenge

The CTO tasked the scheduling team with assessing their current processes and technology to see if they could do better with another solution. A lack of strategic partnership, missing digital transformation capabilities like AI and lack of cloud functionality were key areas of evaluation.

Solution

HCL performed a business assessment for the customer that identified areas of improvement and cost savings. Clara and HERO were big differentiators as they will reduce their annual operating costs. Our cloud-native functionality was also seen as a smooth way to transition to Azure.

Results

- Improved efficiency through automated delivery of critical operations
- Reduced operation cost while maintaining quality and efficiency of services with Hero and Clara
- Accelerated cloud transformation

About HCL Software

HCL Software, a division of HCL Technologies (HCL) develops, markets, sells, and supports over 30 product families in the areas of Customer Experience, Digital Solutions, DevSecOps, and Security and Automation.
