

Trusted for Business-Critical Digital Experiences

HCL DX is the fastest way for practitioners, developers and IT to deliver trusted digital experiences at the intersection of content, applications and processes. No matter the challenge, HCL DX delivers the features your organization needs to be innovative leaders in your industry.

What's New in HCL DX Orion 2022

For Practitioners

Build experiences with less code, faster

Design Studio page editor

Feature

Enhancements to lists, templates & symbols — WCM component interoperability

Benefit

A faster and seamless content-creation experience

DAM extensibility

Feature

Event-based custom functionality — customized editions for specific renditions of assets for target form factors

Benefit

Improved rendition support to provide targeted assets at the right time in the optimal format

Leap v9.3

Feature

DX's embedded citizen-developer capability, HCL Leap, includes updated app design and a new visual workflow experience

Benefit

Create faster and more robust data-capture and process-driven applications that automate information collection and approvals

For Developers

Create, integrate, and automate with ease

AI image tagging

Feature

Automated tagging via Google vision and customizable tagging in the DAM

Benefit

Easily organize assets to provide richer digital content experiences, and curation

DAM production readiness

Feature

DAM staging to production

Benefit

Provide WCM-like syndication and governance to ensure that the promotion of the DAM assets into production rendering mirrors the same process as WCM

For Business Leaders

Deliver a total customer experience

Extensible personalization

Feature

New APIs for rule management and invocation — create and invoke — profile rule for segmentation

Benefit

Deliver programmatic, hyper-personalized content or apps in real time originating from within DX — or driven by third-party applications

Data integration

Feature

Design Studio's new data container and Volt Foundry's middleware and API management provides multiple out-of-the-box data sources

Benefit

Create new data and functionally rich experiences faster and with consistency than ever before. Plug and play with Salesforce, SAP and many others

For IT Professionals

Deploy cloud-native and with lower TCO

New pricing and packaging

Feature

Dynamic auto-scaling and new predictable consumption-based pricing

Benefit

Remove barriers to new cloud-native workloads — to deal with seasonal peaks and autoscaling — while reducing your TCO

Helm deployments

Feature

Transparent, configurable Kube deployments.

Benefit

Deploy faster and with ease by simply switching things on and off

Cloud-native

Feature

Rolling update, logging, and metrics support

Benefit

Manage your cloud-native instances more easily and learn where optimizations can be made faster
