HCL Domino Restart

FERRARI
TEAM
PARTNER

Restart Domino as your unified application development platform. Upgrading to the latest release unlocks new features, enables OS compliance, reduces security risks, and delivers a feature-rich platform supporting your digital transformation journey.

Top Reasons You Should Choose HCL Domino Restart

Nomad Web

Eliminate headaches of upgrading Notes desktop clients

Utilize one-click deployment and work with Domino apps from any leading browser - launching apps in just seconds.

Nomad Mobile

Access Domino apps from a mobile device

Leverage key native capabilities such as biometrics, GPS, camera, and storage right on your mobile device. Use your Domino apps when and where you want - even offline.

Upgrading is a Snap

Never disrupt your business with an upgrade

Easily upgrade Domino regardless of your release version. Upgrading Domino has never been faster or easier, and your applications are backwards compatible.

Modernization

Create better looking apps

Restyle existing Domino apps with a more modern look and UI. Apply new themes, update colors - all in minutes, at a fraction of the cost of rewriting them.

Top Reasons You Should Choose HCL Domino Restart

Harmonious Experience

Integrate seamlessly within your enterprise

Domino supports single sign-on and synchronization of users and groups between Domino and Active Directory.

Compliance

OS support and compliance

Reduce risk of OS non-compliance and external threats by renewing support and upgrading Domino. Domino v9/v10 end of support is June 2024

Cloud Native

Your business, your data, your cloud

Deploy and manage your HCL Software products on the cloud of your choice. Our software can be installed on any Kubernetes environment – public, private, or hybrid – in minutes.
