

HCL Z Data Tools (ZDT)

Flexible, User-Friendly Tools for Enhanced File Processing

HCL ZDT provides flexible, user-friendly tools for enhanced file processing. Manipulate data stored on z/OS systems interactively and in batch processing with a simple, intuitive user interface and remote systems support.

Benefits & Value

HCL ZDT is designed to **deal with large production data efficiently while protecting integrity and privacy.**

HCL ZDT is an essential tool for mainframe application developers and DevOps along with **data access modernization without mainframe data migration.**

Mainframe Data management & analysis provides a powerful set of utilities (e.g Search, Copy, Clone...) to simplify application developer tasks increasing end-user productivity.

HCL ZDT provides **flexible user-friendly tools and rich set of utilities to manipulate Mainframe z/OS Data** that includes - VSAM, QSAM, PDS, PDSE, AIM, OAM), DB2, IMS, WebSphere MQ, CICS and Hierarchical File System under UNIX System Services.

Template knowledge repository supporting Data analysis informs Business Process Optimization.

Ties into the Customer Digital Transformation Program to **drive Business productivity & innovation for application modernization.**

With the greatest percentage of Enterprise **data residing on the mainframe platform, data access is simplified and enabled for digital transformation** using HCL “Z Data Tools”.

Capabilities

No programming required

Easy-to-use templates

Displaying all records or only specific records

Providing generic or specific APIs

Changing column orders or hiding columns based on requirements

Access to CICS resources
