Workload Automation for SAP

SAP® Certified
Integration with SAP S/4HANA®

Automate and boost your SAP landscape with HCL Workload Automation

HCL Workload Automation boosts your business with the most advanced jobs scheduling, management and monitoring capabilities to seamlessly orchestrate complex workflows across multiple platforms and applications.

Our platform acts as a meta-orchestrator for continuous automation, leveraging containerization and an intuitive user interface, while offering the lowest total cost of ownership (TCO) on the market.

HCL Workload Automation Integration for SAP allows SAP users to utilize their familiar software environment to improve service delivery and simplify monitoring and managing cross-enterprise jobs.
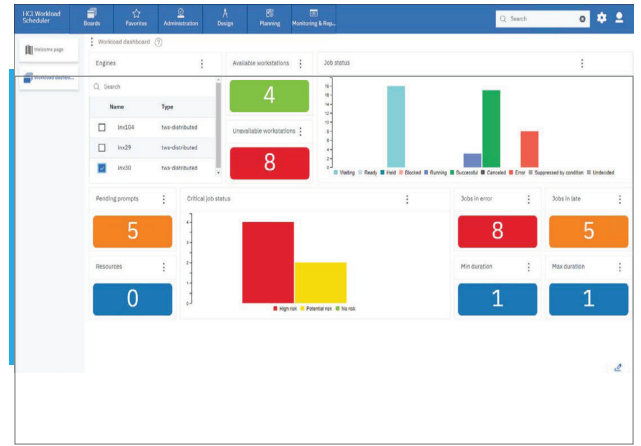

Latest updates!

Enable business control

The new dashboard features machine-learning for predictive estimation of job duration and easy-to-customize widgets.

Get the best of containers

Deploy all HWA components on containers and manage containerized applications.

**docker** | **kubernetes**

Empower users

Workload folders provide:

Greater business agility and enforced security at LOB level

Organize job streams in a hierarchy of folders

Key features

Display all elements together

- A single and simplified point of planning, control and optimization
- Templating and easy porting of loads from QA to production

Enable tight governance

- Enforce rules with little effort
- Track modification requests with auditing
- Based on SOA to facilitate rapid changes

.

Automate end-to-end processe processes

- Improve process integrity and replicability, and automated recovery
- Optimize execution with throttling to speed SAP throughput
- Implement escalation and automatic ticketing

Job editing and linking

- Creation of jobs on SAP from HWA

- Support for BWI objects, support for other objects in SAP stacks

SAP monitoring agent

- Track child jobs and visualize job graphs, impact views, filtered lists, and dashboards

- Consult details of BI objects, exploit advanced SAP login architectures

Key benefits

Reduce 90% of process errors and increase SAP process reliability

Lower operating cost	Higher productivity	Respect SLAs	Higher control

Available On AWS marketplace!

Safeguard mission critical workloads and accelerate event-driven automation with the one-stop automation orchestrator. Explore **more**
