

A leading US beverage company chooses HCL Workload Automation to assist in their cloud transformation

Native integration
with SAP

Improved
operational efficiency

Cloud-native-
as-a-service

Overview

The company produces and distributes numerous brands of bottled water across North America and is the top-selling spring water brand in the United States.

Challenge

The company needed a workload automation solution that would assist in their cloud transformation. With a strong focus on Azure cloud technologies, the company was looking to automate their Synapse data pipeline with a centralized control. Integration with multiple applications such as ServiceNow and SAP was also a strong requirement

Solution

HWA's cloud-native capabilities and over 90 plug-ins made it an easy choice for the customer. The company can now easily ingest their key applications while connecting to the cloud of their choice. They can also easily manage their legacy on-premise workloads with a centralized control

Results

- Improved operational efficiency through the automated delivery of critical operations
- Reduced operation cost while maintaining quality and efficiency of services
- Centralized end-to-end control
- Easy orchestration of SAP business with native integration
