Citizen Development with HCL Volt MX

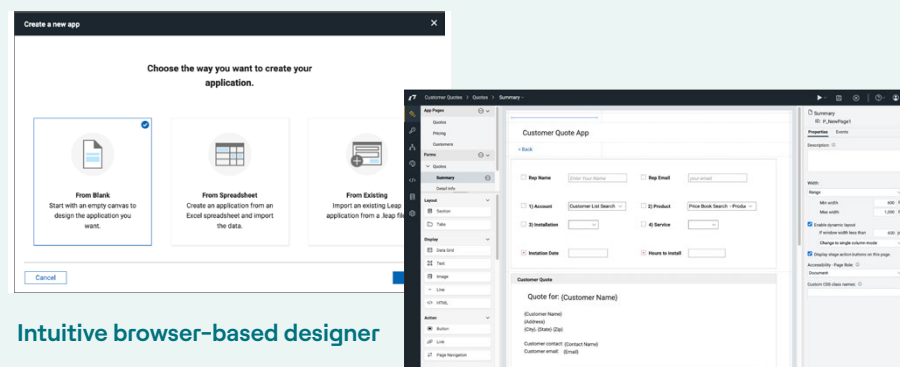

Why Wait for IT?
Build It Yourself in Minutes

HCL Volt MX

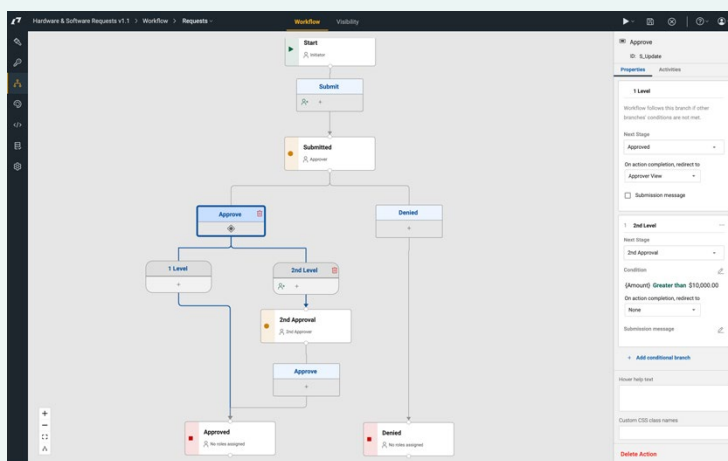

From digitalizing processes to automating workflows, Volt MX enables business users with little to no IT or coding experience to create applications – all with IT oversight.

- **Proven for Business Users:** Volt MX provides a dedicated development experience tailored for citizen developers, reducing learning curves and increasing adoption. Major global organizations have proven 10+ year company-wide deployments with thousands of apps built by business users.
- **Secure and IT-Governed:** With IT in control, Volt MX provides a secure environment that governs integration with enterprise systems and company data, preventing data exposure risks and ensuring security and compliance.
- **Scalable and Economical:** Deployable in your private cloud, pricing is predictable, with no hidden costs for use cases, external users, or connectivity.

Key Capabilities:

- **Intuitive browser-based designer:** Start building apps by importing spreadsheets and design workflows through a simple drag-and-drop interface. Customize the look of your apps without CSS.
- **Seamless integrations:** Integrate with internal and external systems to prepopulate and validate data.
- **Easy workflow automation:** Automate processes with flexible, role-based workflow and access control. Generate notifications, invoke services within workflow steps and provide a dynamic experience based on rules.
- **Strong IT governance:** IT admin controls include defining who can create and use apps, what type and size of files can be added, which services and integrations are allowed, as well as the ability to enable the use of JavaScript.
- **Easy IT and business collaboration:** Professional developers can easily extend and enhance citizen-developed apps with JavaScript, HTML and CSS.

Citizen Development Use Cases

Volt MX has helped organizations across industries build transformative customer and employee solutions, such as:

- Inspection and compliance
- Employee requests: Approvals and tracking
- Reporting dashboards
- Customer lead capture forms
- Surveys and gated offers
- Quote calculators
- Customer onboarding
