

HCL BigFix As Managed Service

The Benchmark For All-in-One Endpoint Management Solution

Now available as a plug-and-play hosted solution, BigFix empowers IT and Security teams, offering endpoint protection, securing and managing endpoints across nearly 100 different operating systems

IT Challenge

A deep dive into the need for Managed hosted Model

"For enterprises that rely on digital technologies, managing complex IT environments while balancing innovation, cost, and scale is difficult. Traditional on-premises solutions struggle to keep up, making managed hosted models a strategic answer to these evolving challenges.

Cyber threat risk

Damages projected to exceed \$10 trillion annually by 2025 (Cybersecurity Ventures)

Infrastructure confidence gap

While 88% of Indian business leaders view their IT infrastructure as top-tier, only 44% feel it is prepared for future risks

Tool Overload

68% of organizations use 11+ tools to manage endpoints

Resource Strain

70% of IT departments are understaffed
- NCC Data

Integration Failure

40% of IT projects fail due to integration issues with existing systems
- IDC

Security Vulnerabilities

The average cost of a data breach is \$3.86 million
- Ponemon Institute

Compliance Gaps

80% of organizations struggle to maintain regulatory compliance
- Deloitte

What Technology Leaders Want

Cost-efficient

robust cybersecurity

regulatory compliance

resource optimization

maximized ROI

BigFix As Managed Service capabilities

The all-in-one managed offering has answers to your business woes:

Lifecycle management:

Streamlined control from provisioning to decommission.

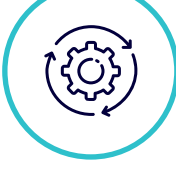

Inventory management:

Comprehensive tracking of all assets including hardware, software, and licenses, across on-premise and cloud environments.

Patch management:

Multi-platform Patch Management and Multi-cloud Patch Management extend security coverage to diverse environments, ensuring that all endpoints are continuously protected and up to date.

Automated lifecycle management:

Orchestrates device provisioning, configuration, patching, and automatic retirement across laptops, desktops, and mobile devices.

Asset Discovery:

The platform provides Asset Discovery of any IP-addressable device, allowing organizations to maintain visibility over their IT landscape

Software asset management:

Builds accurate software inventories, tracks usage, ensures license compliance and understands usage, facilitating audit readiness.

Compliance management:

Implements and maintains compliance, automating continuous enforcement of industry-specific and regulatory requirements.

Vulnerability remediation

Mitigates vulnerabilities and reduces cybersecurity risk in real-time across various end user devices.

98%

Achieve a 98% first-patch success rate.

100%

Gain 100% visibility over all servers

1%

Reduce non-compliant endpoints to less than 1%

94%

Cut compliance reporting time by 94%
