

HCL Domino

Apps That Run Your Business

HCLDomino

Our latest **Domino 14.5** release brings together AI-powered productivity, certified security, and sovereign collaboration — all on the trusted platform that already runs millions of business-critical applications.

Core Benefits of Domino+

Secure, AI-Powered Productivity:

Integrate AI capabilities directly within your secure Domino environment to automate tasks, unlock insights from your data, and boost efficiency without compromising security or data sovereignty.

Trusted Security:

Rely on a platform with robust, certified security features, including advanced authentication (OIDC, Passkeys), full encryption, and granular access controls to protect your sensitive data and simplify IT management.

Sovereign Collaboration:

Maintain complete control over your data with an on-premises or private cloud-hosted collaboration suite, encompassing applications, mail, chat, and meetings, mitigating risks and ensuring digital independence.

Key Highlights

Domino IQ- Your AI. Not Theirs.

Domino IQ brings AI capabilities such as summarization, response suggestions, and task extraction directly into your Domino apps—securely, privately, and without the need for third-party cloud services.

- Run private LLMs (e.g., Llama, Mistral) on your own servers”
- Works with existing Domino apps
- Optimized for NVIDIA GPU support
- No data sent to OpenAI, Microsoft, or AWS

Sametime 12.0.3

Sametime delivers a redesigned experience, greater accessibility, and persistent mobile collaboration — all fully within your infrastructure.

- Modern UI with HCL Enchanted + React
- Accessibility compliance
- Persistent notifications for mobile
- CCB entitlements include secure file transfer and chat links

What's New in HCL Domino+

AI-Powered Productivity. Trusted Security. Secure Collaboration

Key Business Features	Benefits
Domino IQ – AI-powered Productivity	Maintain data privacy and reduce AI-related risks by leveraging offline AI (LLMs) for summarization, content generation, and insights.
Access Apps Anywhere with Nomad	Save time and effort by using Domino apps via browser or phone—no rewrites needed. Now includes the ability to leverage desktop apps and connected devices such as Excel and label printing.
Domino Leap Entitlement	Full Leap entitlement, including use of the Supporting programs LEI and SAP connectors (use of HCL Link excluded), with CCB Term.
Sametime Read Receipts and Mobile Notifications	Get real-time visibility into message delivery and persistent alerts across devices so you don't miss a time critical update.
BSI-certified* for Government-Grade Security	Domino, Verse, & Sametime have been certified by BSI IT-Grundschutz standards, for information security to protect the Governments and regulated industries.
Meeting Transcripts	Save time and never miss a key point with automatic transcripts for every recorded meeting.
Domino License Dashboard	Gain clear visibility into license usage and entitlements for better compliance, planning, and cost control.
Edit Files from Any Device	Co-edit attachments in browser or desktop using Domino REST APIs, with tools such as Office and Collabora.

Key Technical Features	Benefits
Enterprise Single Sign-On with OIDC	Reduce complexity and configuration time for admins by integrating with enterprise identity systems and offering seamless SSO across your environment.
Domino Server Auto Update	Reduces admin time and risk by automating Domino server updates across your environment.
Authenticate Securely Without a Password	Faster access, fewer IT tickets, and reduced risk of hacking by allowing users to log in using secure, phishing-resistant Passkeys.
Security Information & Event Management	Save time during incidents with best practices and guidance for using SIEM tools, such as Splunk, with Domino and Sametime.
Modern Tools for Developers	Greater development productivity and higher-performing apps with Java 21 and Eclipse updates, saving time.
Admin Tasks in AdminCentral	Save Admin time by managing servers and users from a browser-based interface.
Non-containerized Sametime Chat install	Faster and easier deployment of Sametime Chat on Microsoft Windows server environments by 50%.

*HCLSoftware, in partnership with ilink, is awaiting publication of the IT-Grundschutz Certification for HCL Domino, Verse and Sametime. HCL and ilink have completed all milestones and passed the final certification audit. Once notified by BSI, HCL will send out a communication.
